Winston-Salem, NC 27103 | +1 336 831 3432 | pp101socials@gmail.com OR codingthefront101@gmail.com

---

## Summary

To seek out a career in the Front-End Web Development field. Experience includes collaborating in team-driven environments to create high-performance websites that customers and business both loves. Familiar with applicable design and user practices. Motivated professional offering Associate's Degree in both Web Technologies and Programming and Software Development. Adds value to any organization in need of great collaboration, interpersonal and multitasking abilities. Meets tight deadlines.

## Objective

Recent graduate with an Associate's Degree in both Web Technologies and Programming and Software Development. Currently seeking to leverage skills in coding (HTML5, CSS3, JavaScript, Next.js, ReactJS), problem-solving, and communication to gain professional experience in a Front-End Developer role. Previous experience consists of personal website design projects, but possesses a strong desire to learn in a professional capacity.
